

# Moonlight Addendum 1: Token Allocation

The following addendum further defines the content found in the Moonlight white paper, Section 6 with particular emphasis on token and funding allocation within the project as well as their vesting structure. All tokens have a minimum vesting period outlined in Section 6 of the white paper. Vesting periods defined here are additional.

**Note:** Allocations are approximate and subject to change as project needs arise. The Moonlight team will attempt to be as transparent as possible when these changes occur.

Figure 1: The detailed resource allocation for the Moonlight Project.

- **{a} Founders:**

The founders token allocation to be uniformly distributed amongst leadership team. Disbursement to individuals is contingent upon performance and role in leadership position on the project.

*Vesting:* Token vesting follows a linear quarterly maturation over 18 months beginning from 6 months after completion of the token sale.

Figure 2: The detailed token allocation for the Moonlight Project.

- **{b} Strategic Investments:**

Lux will be used to form and incentivize strategic partnerships that will yield successes for the Moonlight platform

*Vesting:* There is no vesting period for this allocation due to immediate need for business growth. The Moonlight team may choose to distribute these funds to strategic partners using another vesting strategy at their discretion.

- **{c} Core Development and Advisory Budget:**

Token allocation to incentivize and reward core developers and advisors for contributors to the project.

*Vesting:* There is no vesting period for this allocation. However, the leadership team may institute a vesting strategy on individual allocations at their discretion.

- **{d} Vested Project Growth:**

*see white paper*

*Vesting: see white paper*

- **{e} Regular Staffing:**

Funding allocation to be used as income for Moonlight staffing.

Assumes 20 Full-Time-Employees for 3 years.

*Vesting:* There is no vesting period for this allocation due to immediate need for business growth.

- **{f} Task Seeding, Marketing, and User Base:**

Because Moonlight relies on an active user-base, a significant allocation of funds will be used for community growth. A portion of funding will be used for marketing purposes. The remainder will be used to create tasks within the Moonlight platform to draw contributors into the Moonlight platform while improving the Neo Ecosystem at the same time (through completion of these issued tasks). Tasks seeded by this allocation will incentivize development in two areas:

1. Realization of Moonlight Swimlanes
2. Core improvements to the Neo Ecosystem

*Vesting:* There is no vesting period for this allocation due to immediate need for business growth.

- **{g} Business Health, Infrastructure, and Strategic Investments:**

Funds allocated to non-headcount business operating expenses (including legal/regulatory and IT) as well as strategic investments directly tied to the ongoing health of the Moonlight project including partnership incentives.

*Vesting:* There is no vesting period for this allocation due to immediate need for business growth.
